**CONSTRUCTION CHARACTERISTICS**

**PUMP**

- Abrasion-resistant construction.
- The front wear ring, combined with the floating impellers, ensures optimum resistance to sand abrasion.
- The upper and lower supports are made of precision-cast stainless steel, ensuring resistance to corrosion, durability and a sturdy coupling to the motor.
- The hexagonal pump shaft guarantees an effective impeller driving.
- Stainless steel non-return valve integrated in the head
- The e-GS series pumps can be coupled to either the 4OS or L4C motors.

**MOTOR**

For the motor features, please refer to the specific technical brochures.

**OPTIONAL FEATURES**

- Different voltages and frequencies.
- Cooling sleeves
