

Introducing a
full line of potable
drinking water products
that aren't just clean –
they're also green.

Bell & Gossett is committed to providing water handling products that are efficient, safe, innovative and environmentally responsible. That's why we've expanded our line of lead-free potable drinking water products. Now our pumps, circulators, flanges, tanks, valves and boosters intended for potable water applications are made of lead-free brass materials. They meet the requirements of California's AB1953 and Vermont's S152 legislation, and exceed current requirements in the other 48 states.

Full line of lead-free
potable water products
