# Smart Preventative Maintenance Agreements

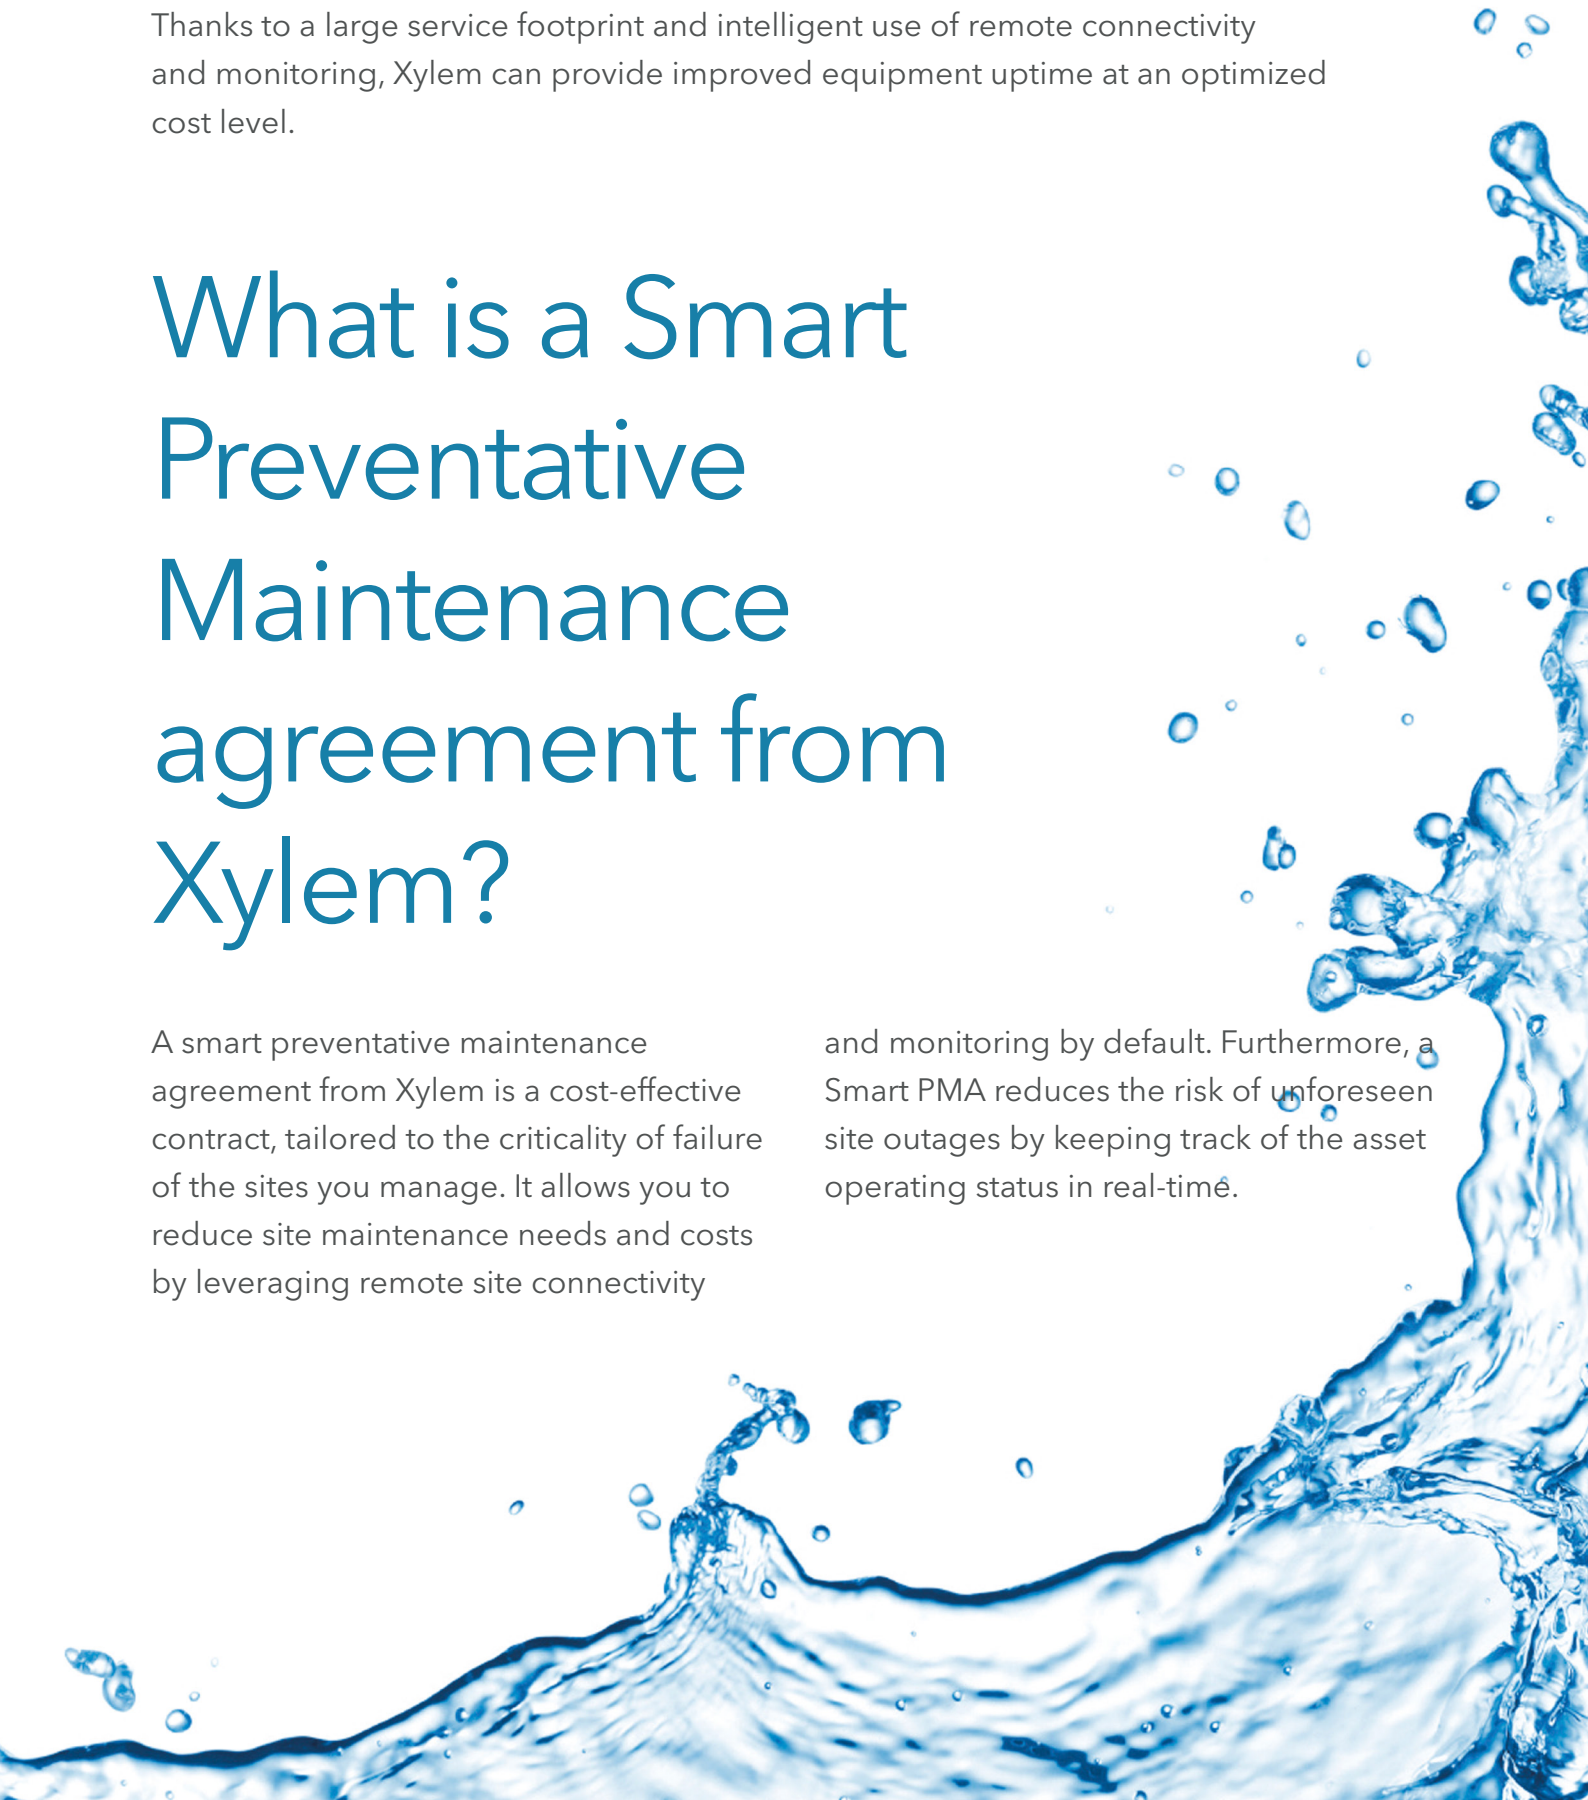

Are you experiencing costly unplanned outages or increased maintenance costs at your wastewater pump stations, treatment plants or clean water installations? Xylem offers a Smart Preventative Maintenance Agreement (PMA) which combines remotetelemetry/monitoring with a condition or usage-based maintenance schedule to deliver reduced failure risk while reducing the operational cost for your sites.

Thanks to a large service footprint and intelligent use of remote connectivity and monitoring, Xylem can provide improved equipment uptime at an optimized cost level.

# What is a Smart Preventative Maintenance agreement from Xylem?

A smart preventative maintenance agreement from Xylem is a cost-effective contract, tailored to the criticality of failure of the sites you manage. It allows you to reduce site maintenance needs and costs by leveraging remote site connectivity

and monitoring by default. Furthermore, a Smart PMA reduces the risk of unforeseen site outages by keeping track of the asset operating status in real-time.

# Smart Preventative Maintenance Agreement

- PMA Contract (1-5 years)
  - 24 Points Check
  - 24/7 & 365 Day Telephone Support (Paid Option)
  - Emergency Response - Office Hours (Paid Option)
  - Emergency Response - Out of Office Hours (Paid Option)
  - 24/7 Remote Monitoring & Supervision (Paid Option)
  - Planned maintenance costs included
  - Annual Site Condition Report on asset performance, key events and alarms
  - Remote cloud-based smart monitoring
  - SLA site visit (Max running hours since last check)
  - Rental (Paid Option)
  - Multi-site discount
- Note! Consumables are not included in agreement

## We offer Smart PMA contracts for:

Wastewater or Stormwater Pumping Stations

Wastewater Mixers

Aeration Blowers for Wastewater Treatment

Sewage Treatment Plants

Booster Sets

Circulators

# Xylem |'zīləm|

- 1) The tissue in plants that brings water upward from the roots;
- 2) A leading global water technology company.

We're a global team unified in a common purpose: creating advanced technology solutions to the world's water challenges. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. Our products and services move, treat, analyze, monitor and return water to the environment, in public utility, industrial, residential and commercial building services settings. Xylem also provides a leading portfolio of smart metering, network technologies and advanced analytics solutions for water, electric and gas utilities. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise with a strong focus on developing comprehensive, sustainable solutions.
