

GPDA MEMBERS: Earn points when you expand your knowledge!

Goulds Water Technology e-Learning

is an online training program focused on the latest advancements in residential and agricultural water technology applications. The virtual program is an extension of the in-person, hands-on training offered at the Goulds Water Technology Factory School in Seneca Falls, New York.

What is e-Learning?

e-Learning is a convenient way to receive industry leading training through your computer when traveling to the Factory School is not possible.

How do I learn more?

Click here to explore the e-Learning program. View the courses offered. Discover what states offer CE credits for these courses, and more. goulds.com/e-learning/

Is there a fee for this training?

All courses are offered complimentary

What courses are available?

Click here to view the course catalog

Courses focused on industry training:

- Basic Water Systems Training
- Introduction to Vertical Turbine Pumps
- Variable Frequency Drives
- Wastewater Training

Courses specific to Goulds Water Technology:

- 4" Submersibles
- Jet Pumps

How do I earn points?

Points are awarded when you or any individual in your GPDA organization completes a course. Points noted below are awarded upon completion and are per person.

Basic Water Systems Training: 5,500 points

Introduction to Vertical Turbine Pumps: 1,500 points

Variable Frequency Drives: 2,000 points

Wastewater Training:
1,500 points

4" Submersibles: 500 points

Jet Pumps: 500 points

How do I get started?

Register here for the Goulds Water Technology e-Learning program. Enter your contact data in the required fields and create a password.

- If CEUs are needed for your license, be sure to include your license number.
- Password criteria:
 - Upper & lower case letters
 - A number
 - A special character (\$#%&*)
 - 12-20 characters long
 - An example of a password meeting all criteria:
GWTtraining1+
- Your username will be your email address entered in the registration data fields.

I'm registered. Now what?

Welcome to the Goulds Water Technology e-Learning Welcome Page

WELCOME TO THE
Goulds Water Technology
eLearning Center

Welcome, Trainer Trainer, to Goulds Water Technology eLearning program.
This program has been built to be an extension of the industry leading training offered at the GWT Factory School in Seneca Falls, NY, where for more than 30 years, thousands of water industry professionals have been educated about the latest products and trends.

Need CE hours? Many states are approving our courses for CE hours. Approvals are continually being received. Check back if your state is not currently listed.

For Wastewater Operator Professionals: Variable Frequency Drive and Wastewater Training have been approved for CEUs in Washington & Wisconsin. In Washington, earn 0.2 CE hrs per course. In Wisconsin, earn 1.5 CE hrs for Wastewater Training and 2.0 CE hrs for Variable Frequency Drives. Students must successfully complete the courses to be eligible for the credits. **[Access]** Users may not retake the same course for credit more than once in a 1-, 2- or 4-year term of a specific credential.

Scoring: Please take your time when completing these courses. Because these courses are approved for continuing education in many states, the certificate of completion will only reflect your first score received.

Retaking a course: For CEUs, many states will allow you to retake a course for credits as long as it falls outside of a specific period. Please check with your state for their specific requirements. If you are taking the course a second time for credits, you must first:

- Submit a request to: learningsupport@xylem.com
- Specify which course you would like to retake
- Once you have received acknowledgement of your request, the course will be available in your "Active" transcript section.
- Launch and complete the training.

Contact Us

On the right side is a box called "Browse for Training."

- Click on that box and all available courses will be listed.
- Select the course you wish to take
- Click "Launch"
- The course will open in a new window and will start automatically. At the end of each slide click "Next" until you have finished the course.

- You are able to start and stop the course as needed. When starting back up, you will be asked if you want to continue where you left off or start over.
 - If you have not completed the course, click the option which allows you to continue where you left off. All previous scoring will be kept as you continue the course.

IMPORTANT SCORING INFORMATION:

- Please take your time when completing these courses. Because these are approved for continuing education credits, the system will only recognize the first total score you receive.
 - If you repeat the course, the system will not recognize your new score
- There are quizzes after each module/chapter. You must complete all quizzes through the entire course.

Now that I've completed the course, when will I see my points?

e-Learning reports are ran on a quarterly basis. Every user who has completed a course during that time frame will be awarded points accordingly.

How will I know when new courses are added?

Stay up to date on e-Learning information by:

- Follow us on social media for e-Learning updates
- Goulds Water Technology e-mails
- eCOM announcements
- Log into the e-Learning platform. New courses will be listed under "Featured Training"
- Visit the e-Learning page on goulds.com

Introduction to Vertical Turbine Pumps
Online Class - Xylem U.S.

Launch

In this three module course, take an introductory look into vertical turbine pumps. Understand the markets and applications each type of vertical turbine pump is best suited for. Explore the components, materials of construction and typical terminology associated with these pumps. And finally, discover how to properly size and select a turbine pump for the application.

Available Languages
English (US)

CONTINUING EDUCATION INFORMATION:

Click here to stay up-to-date on the states that have approved courses for continuing education credits and any special requirements specific to your state. State approvals are continuously being updated.

- **Reporting:** You are required to submit your continuing education activity to your State as required by them.
- **Certificate of Completion:** A certificate of completion is available in the "My Transcript" section when logged into your e-Learning account.
 - Change "Active" to "Completed"
 - Click the down arrow on the right side associated with the course
 - Click "View Certificate"
 - Print to the printer of your choice.

As a reminder, the certificate will only reflect the first score received for the course. So please take your time when completing the course.

CONTINUING EDUCATION FAQ'S:

My state allows me to take this course again for credits after a certain number of years. Will my transcript reset?

Your transcript will not reset after a certain time period. If you are taking this course again for credit with your state, you will need to request that your transcript be reset.

- Submit your request via e-mail to: learningsupport@xylem.com
- Do not log in to complete the course until you have received verification that the course has been reset.

Multiple employees in my office need to take the course for credit, can we all use the same account?

Each employee will need to create their own account if submitting for continuing education credits. The certificate of completion will only recognize the first score, and will contain the person's name the account was set up under.

- There is no limit to the number of accounts a business can have
- Only one account can be created per e-mail address

I've completed the course; will you submit the information to the state for me?

You are required to submit the information to your state as they require. Very few states require Gould Water Technology to submit the CEU information on your behalf. When required, we take care of that process. If you are unsure of your states requirements, please contact them directly to ensure you receive your credits appropriately.
