

HYPACK Marine Search Tutorials (and more) on our New YouTube Channel: “HYPACK Video”

By Rob Baird

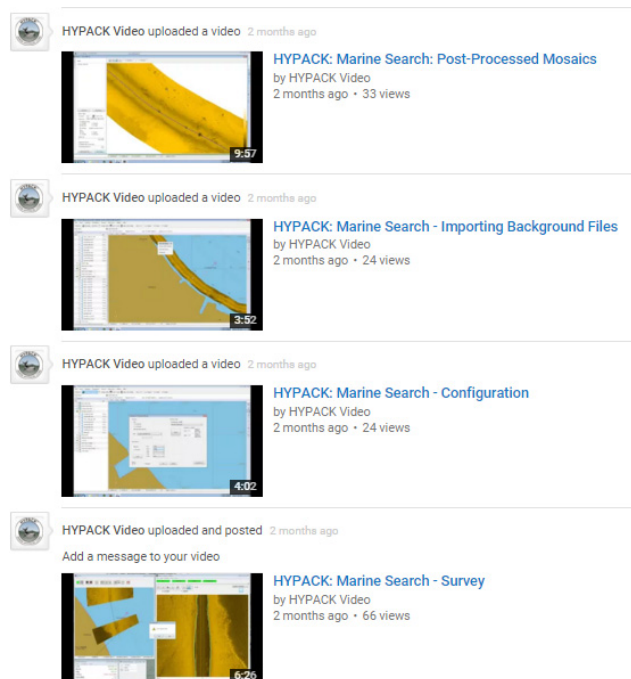

Since the recent acquisition of HYPACK by Xylem, we have made a few changes in the branding of our products. This has also translated to our line of HYPACK® tutorial videos on YouTube. The array of recently updated videos includes numerous HYPACK® 2015 how-to videos that can easily be found on YouTube by searching for our new channel name, “HYPACK Video”.

FIGURE 1. HYPACK Video on YouTube

Once on the “HYPACK Video” YouTube Channel, you can browse through the list of videos and watch any of the do-it-yourself tutorials.

We have recently uploaded several videos that feature our newest product, HYPACK® Marine Search. In the Marine Search videos, HYPACK founder Pat Sanders demonstrates how to configure a side scan sonar with the simplified Hardware/Geodesy module, how to import background charts for use in the Marine Search application, how to run a Marine Search survey, and how to post-process mosaics after the Marine Search survey is complete...

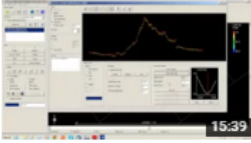

We also have several new how-to videos for running patch tests in MBMax64 with single, dual and tilted-head multibeam sonar systems. HYPACK® Support technician, Joe Burnett, demonstrates the various patch testing methods in these tutorials...

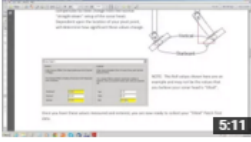

Please also consider subscribing to our "HYPACK Video" channel for updates on newly uploaded videos!
