

HYPACK® 2015 Map Window Scale and Map Position

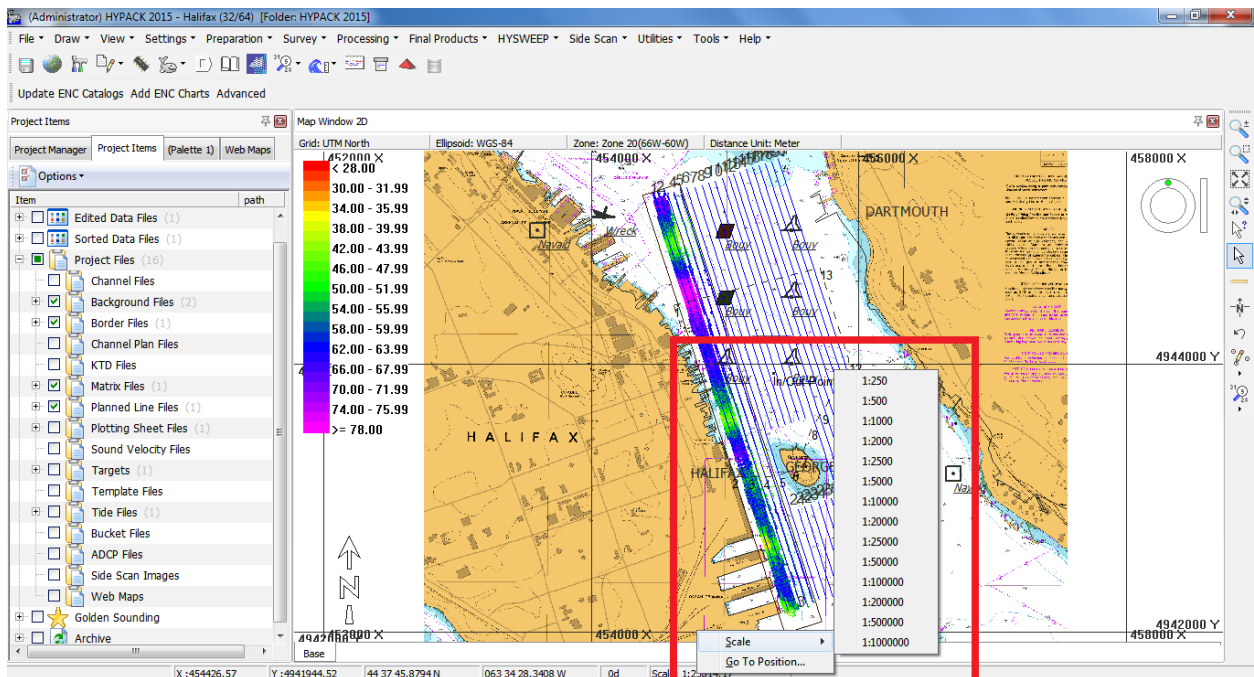

By Christian Shaw

In HYPACK® 2015, you have the (somewhat hidden) ability to set the scale and to set the HYPACK® Shell Map to a user-defined position.

At the bottom of the HYPACK® Shell, right-click with the mouse where the scale and coordinate display information is and you can enter a user-defined set of parameters.

You can set the scale:

FIGURE 1. Setting the Map Scale

You can set the coordinates for the position around which the map window is centered.
