Sounding Better!

Remaining 2017 USA HYPACK® Trainings

By Christine Roca

HYPACK® Single Beam Training:

Location: Tampa, FL

Date: October 24th & 25th

Description: This training will concentrate on using HYPACK® for your single beam survey set up, data collection and processing of single beam data.

HYPACK® Multibeam Workshop:

Location: Wilmington, NC

Date: November 7th-9th

Description: This 3-day workshop is hosted by Cape Fear Community College. It will focus on HYPACK®/HYSWEEP® multi-beam applications. Day 2 there will be practical training on board CFCC's research vessel.

HYPACK® DREDGEPACK®/VOLUMES Training:

Location: Orlando, FL

- DREDGEPACK® Course: Nov 7-8
- Volumes Course: Nov 9-10

Description:

- DREDGEPACK® Course: This training centralizes on the basics of dredging using DREDGEPACK® software on various dredge types.
- Volumes Course: This course provides instruction in the volume computation methods available in HYPACK®.

HYPACK® Magnetometer, Side Scan and Sub-bottom Training:

Location: Houston, TX

Date: December 5th-7th

Description: This training is split to concentrate on these three different topics. Day 1 will focus on magnetometer hardware, data collection and processing, while Day 2 will focus on side scan and sub-bottom hardware, data collection and processing. Day 3 will be a boat demo hosted by Subsea Technologies showcasing HYPACK® SUB-BOTTOM!

If you would like more information on any of the trainings listed above, please contact us at training@hypack.com or (860) 635-1500.
