

# HYPACK 2024 Event Recap

January 8-11, 2024  
Savannah, Georgia

# HYPACK 2024

31ST ANNUAL TRAINING EVENT

By Brittany Heins

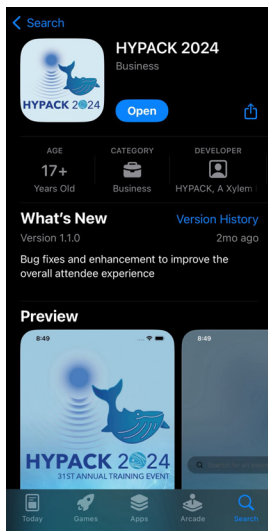

Thank you to everyone who joined us for the 31st annual HYPACK Hydrographic and Dredging Training Event! HYPACK 2024 was held in Savannah, Georgia, from January 8-11, 2024. We are excited to announce that we had over 400 people register for the training! During the event, we revealed the newest version of our software, HYPACK® 2024. Attendees were the first to receive training on these new features. Not only did the HYPACK Training Event offer essential instruction in hydrographic and dredging applications, it also provided an opportunity for attendees to network with others and view exhibits from industry-leading hardware vendors, equipment resellers, and service providers. Our goal at HYPACK is to provide companies with the tools that are needed to succeed and provide an advantage in this industry.

HYPACK offered many training sessions that focused on comprehensive instruction in HYPACK®, DREDGEPACK®, and HYSWEEP® software. We provided sessions for those who are just beginning to use HYPACK as well as expert sessions for more in-depth training on a particular subject. Throughout the event we also offered live streamed demos into the classroom. New this year, we had User-Presented Case Studies (like the Seafloor Systems Demo shown on the right)! These were a huge hit. Attendees really enjoyed listening to these presenters show their success stories using HYPACK® software.

Another new addition to our training was our event app! We received great feedback on how beneficial it was to have this tool added to our event. Attendees were able to receive reminders, set their own schedule, view the exhibitors, connect with other attendees, and more!

Along with training sessions, we held our annual Q&A session. Our panel of experts answered both pre-selected and random audience questions. This was a great opportunity for attendees to have direct access to the HYPACK Team to further their knowledge of our products and solutions. In addition to our Q&A, the event also offered one-on-one sessions throughout the 3 days. Attendees were able to set up time with our tech support personnel and programmers to assist with project specific questions.

Our exhibit space had 29 exhibitors who joined us for our 31st annual training event. The exhibit hall was a place for attendees to network and learn more about the different products and services our exhibitors offered. The exhibit hall was filled during our ice breaker event, reception, and during all the mini breaks throughout the day.

## HYPACK 2024 EXHIBITORS

The Humber Classic Golf Tournament was also a great success and we had a great time with everyone who registered to show off their golf skills before pre-registration kicked off! The HYPACK team can't wait to get back on the course with everyone next year!

We would like to extend a special thank you to all the attendees and exhibitors who joined us this year. You helped make HYPACK 2024 a successful, memorable, and exceptional event! We hope to see everyone at HYPACK 2025, location TBD!

For more information on upcoming trainings and seminars in 2024, please visit the [Training Page](#) on our website, or contact [training@hypack.com](mailto:training@hypack.com).
