

xSight App

Powerful UV treatment intelligence in the palm of your hand

The key to increasing uptime

When it comes to efficiently managing water treatment, knowledge is power and now it's available in the palm of your hand. WEDECO's innovative xSight App makes effective disinfection easier than ever before by simplifying troubleshooting, and routine maintenance. xSight is quick, simple, and convenient to use, providing a personal view into your UV system by narrowing down the most critical data shown on the PLC to be visible on a single customizable dashboard on a mobile device. It enables a clear, real-time view of the status of a UV system, including UV dose, transmittance, flow rate and lamp operation as well as critical alarm notifications when connected.

Superior Efficiency

Each element of the xSight App has been designed to increase operational efficiency and reduce system downtime. The ability to access trend data provides insight into a system that can support preventative maintenance and optimize performance. In addition, when support is required, the app provides seamless access to online troubleshooting guidelines for resolving common UV issues, which speeds up resolution times and increases system uptime. Ordering of spare parts is made easy by notifications sent out ahead of time. Plus, reporting is simplified by summarizing daily parameters impacting UV system performance, saving operators time while ensuring all critical data points have been captured.

1 Quicker mobile troubleshooting

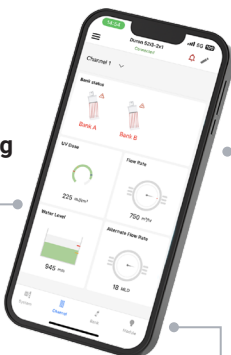

2 Cybersecure

3 Simpler reporting

4 Increased operational efficiency

5 Reduced downtime

6 Easy access to trend data

Did you know?

The xSight App is available for all Duron UV disinfection systems and is suitable for all operator expert levels.

Features & Benefits

Single dashboard to display process data

- Can be accessed remotely with mobile device
- Real time monitoring of UVT, flow, dose, lamp hours, lamp power when connected and within 32 to 50 ft range of cabinet (10 to 15m)

Troubleshooting & maintenance support

- Easy access to troubleshooting guides and maintenance videos (possible with online or offline connection)
- Operator able to send daily alarm notifications by email (when connected)

Secure access

- Encrypted Bluetooth connectivity
- Read-only data
- Online documentation stored in secure cloud
- Follows Xylem security standards

Trend monitoring & reporting

- Read and display logged system data over 2 days and compare trends to prevent failures and reduce maintenance (longer term trend data possible as part of a preventative maintenance contract)
- Capture daily trends or performance metrics and attach to emails (when connected)

Easier parts ordering

- The system notifies customers when UV-lamps exceed 80% of the warranty period, helping ensure spare parts availability and performance is maintained
- Mobile accessible parts list makes it easy to track correct part numbers for placing orders

System security you can trust

The xSight App offers high security for superior system safety and operating confidence and includes expertly engineered features and protocols that reduce the risk of cyber-attacks. xSight app connects the mobile device to a secure EcoTouch 7 controller via encrypted Bluetooth connectivity to allow safe data access, eliminating the need for 24-hour connectivity. Additionally, the app is read-only and requires all users to create an account with Xylem to obtain access to a specific UV system and its data.
