RE: Discontinuation of the H-3553 Bubblers

Dear Valued Customer,

YSI has been very proud to introduce the [Amazon bubbler](http://www.yxi.com/Amazon) (www.yxi.com/Amazon), which has gained a reputation for being the most accurate and best-performing bubbler for water level monitoring available today. The Amazon has a host of features allowing for better performance in difficult site conditions and offering a range of options for both integration and communication.

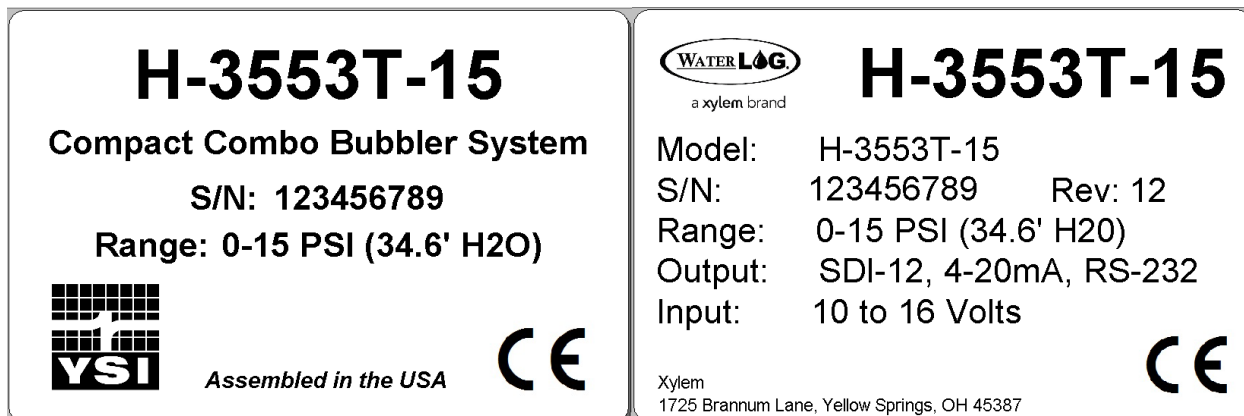

In conjunction with the launch of the Amazon, YSI continued to offer the **WaterLOG H-3553 bubbler** to ease the changeover for users with large fleets of bubblers. Released to the market in 2010, the H-3553 has reached end of life and **will be discontinued by the end of 2017**. This will affect all the models and ranges associated with the H-3553 series of Bubblers:

H-3553T-15, H-3553T-15-I, H-3553T-15-D, H-3553T-15-I-D, H-3553T-30, H-3553T-30-I, H-3553T-30-D, H-3553T-30-I-D, H-3553T-50, H-3553T-50-I, H-3553T-50-D, H-3553T-50-I-D.

The H-3551 bubbler, which does not have an integrated pressure transducer as contained within both the Amazon and the H-3553, will continue to be available as demand merits. The pictures below have been provided to help you discern whether you have an H-3553 bubbler, just in case you own a bubbler and are not sure which model you have.

Further, on the side of the H-3553 bubbler's enclosure, there would be a label that looks similar to one of the two options below, depending upon when you bought it.

While the H-3553 will **no longer be available for purchase after December 31, 2017**, we will as always honor our commitment to customers to provide technical and service support for our products, even after their discontinuation. Any H-3553 bubblers still in service or purchased prior to December 31, 2017 will be serviceable until December 31, 2020 at a certified YSI repair center.

It is always our aim to serve our customers in the best manner possible, and so we wish to hear from you regarding your future needs as they may relate to any of these technologies, including whether you have any concerns regarding the H-3553's discontinuation, or an interest in the new Amazon bubbler. Please contact your [sales representative](#) to discuss the bubblers, or feel free to contact me at the email address below my signature. A distributor or sales representative can be found under the Customer Support menu at www.ysi.com.

Best regards and thank you for allowing us to serve you,

Stephanie A. Smith
