

Secure Necessary Back-Ups to Address All System Failures at All Times

RAPID DEPLOYMENT OF PUMPING SOLUTION TO EVACUATE WATER

The current environment puts a lot of stress on your teams, workflow and infrastructure, including hospitals. Demand on water consumption and higher degree of solid content in the sewage may result in pipe break downs or clogging.

Xylem dewatering pumps are up to any challenge

- Xylem Rental Solutions offer quick set up of the infrastructure necessary to transport clean water and discharge waste water to the treatment plant
- Utilize our portfolio of Godwin automatic self-priming pumps and Flygt electric submersible pumps with self-cleaning, non-clog impellers that deliver superior non-clog performance
- Advanced remote monitoring and controls provide insight on system performance no matter where you're located
