

Complete UV & Ozone Disinfection solutions from a single source. **Next-level rental.**

At Xylem we rent out more than just pumps and treatment systems. We offer world-class expertise to provide you with cost-effective, reliable and innovative full-service solutions for even the most complex applications. Careful preparation makes all the difference:

Flood Mitigation

Some areas are prone to flooding after heavy rainfall which may be contaminated and therefore need to be treated before pumping to ground water sources. Xylem can provide deployable UV units for this application

Emergency Disinfection

When breakdown occurs with treatment processes emergency disinfection units can provide a quick and reliable solution whilst repairs are completed.

Temporary treatment for plan refurbishment/replacement

When existing plant needs to be replaced rental units provide stop-gap solution enabling the continuation of effective treatment

Environmental Compliance to meet consent requirements

Discharges often need to be treated to comply to environmental consents. Treatment rental provides a quick and easy option.

the professional pre-assembly of your potable or wastewater rented system by our experts saves you both time and money. Systems and components from Xylem Rental Solutions are always tailor-made to meet your individual requirements.

This makes for increased operational safety and guarantees that the technology always works under optimal conditions. That's what we call **next-level rental.**

Plug & play installation

All Xylem treatment rental units are skid or containerised which enables rapid deployment. Dedicated Rental Operations managers ensure a seamless integration into your system.

Large fleet of UV with Validated dosing and Ozone for Potable & Wastewater

Xylem has a comprehensive range of rental UV and Ozone units for both clean and wastewater applications with assistance from Xylem's product specialists and applications engineers.

Ozone or UV to reduce the use of chlorine

Pre-treatment with Ozone or UV can reduce the amount of chlorine or other chemical disinfectants for water supplies within a distribution network or process stream.

Full service and technical support

All rental units are fully supported by our dedicated and fully trained service engineers.
