

Preventative Maintenance Agreements For Flygt Pumps and Equipment

ENSURE MAXIMUM EQUIPMENT UPTIME AT THE LOWEST OVERALL COST

We want to help increase the life and efficiency of your equipment. With a preventative maintenance agreement (PMA) from Xylem, you can ensure maximum equipment uptime at a manageable cost.

What is a PMA?

A preventative maintenance agreement is a service contract tailored to meet your specific needs and requirements. A PMA includes scheduled visits at your convenience that enable our technicians to service your equipment to keep it running smoothly.

Why Xylem?

Xylem has over 50 years of experience in the pumping industry. Our service vehicles are fully equipped with all the tools, supplies, and parts required to carry out inspections and services.

If a Service Technician encounters a problem that requires specialized support, he or she can make repairs on-site.

Key benefits

- Control over your maintenance budget
- Equipment status report provided after each inspection
- Priority service on all repairs (both planned and (emergency) by authorized Service Technicians
- 24-hour response guarantee for emergencies
- Unlimited telephone support
- Keep your equipment within warranty

The bottom line

With a PMA from Xylem, you can trust that your equipment is in good hands. The risk of breakdown is minimized and we will work with you to make sure your equipment is performing at maximum efficiency.

Which service suits your needs?

PMA for Flygt Dewatering Pumps

Option #1: 2 Visits Per Year

Option #2: 1 Visit Per Year

- Check electrical condition of insulation on power cable(s) and on all phases of the motor
- Measure resistance between stator windings (*in Ohms*)
- Check amperage draw on all phases of the motor (*in Amps*)
- Check condition of upper and lower shaft seals (*inspect condition of motor / stator housing, if applicable*)
- Check and clean volute
- Check impeller clearances
- Check for any unusual noise in the upper and lower bearings
- Check for physical damage of wearplate(s)
- Inspect condition of oil in oil housing, and change if required
- Test the pump operating cycle, under load at our facility

* Most common plan shown above. Custom plans are available. Above services are performed on site or at a Xylem branch by our factory certified Service Technicians.
